## (c) "AUTOTYPE COLOUR PRINTING PROCESSES"

56 pp. Illustrated. Price 4s. (Post free 4s. 3d.)

The above publication produced by the Autotype Company Limited gives full working instructions for the making of Colour Prints on Paper, Transparencies and Anaglyphs by the following Autotype Colour Processes.

### TRICHROME CARBRO

This is the method which for many years has been pre-eminent in the field, and is still preferred by the majority of colour workers.

### CONTACT CARBON

Describes the making of colour prints by contact from colour separation negatives.

### DIRECT ENLARGEMENT CARBON

A new development made possible by the improved printing speed of Autotype Papers and the recent introduction of sources of illumination of high intensity and actinic value.

### WET PRINTED CARBON

Another new method, by which colour prints can be made in the shortest possible time. Invaluable to the process engraver and the serious worker who wish to make a quick check of the colour balance of separation negatives and the accuracy of retouching. It will also be found attractive by the amateur seeking an introduction to colour printing processes.

## (c) OTHER AUTOTYPE PUBLICATIONS

"THE CARBRO PROCESS" ... ... ...	7d. (post free 9d.)
"BRIEF WORKING INSTRUCTIONS FOR THE CARBON AND CARBRO PROCESSES" ...	6d. (post free 7d.)

## (A) TRICHROME TRIAL OUTFITS

Containing pigment papers, transparent celluloid, temporary and final support papers, waxing compound, Carbro solutions A and B, flat squeegee.

With instruction Book "Autotype Colour Printing Processes" ... ... ... ... 25/-

## AUTOTYPE TRICHROME PIGMENT PAPERS

The following Pigment Papers are now available and customers are asked to take care to quote series and reference numbers when ordering so as to avoid the possibility of error.

### SERIES 1. Suitable for Carbon printing only.

No. 170 Yellow. No. 172 Magenta (Red). No. 173 Cyan (Blue). The colours of this Series are of excellent transparency and brilliance, and are as nearly as possible theoretically accurate. The permanency is not of a high order.

### SERIES 2. Suitable for the Carbro Process only.

No. 270 Yellow. No. 272 Magenta (Red). No. 273 Cyan (Blue). These colours are neither so transparent nor so brilliant as Series 1 and 3, but are more permanent. It is proposed to use more permanent colours as and when they become available.

### SERIES 3. Suitable for Carbro Process only.

No. 370 Yellow. No. 372 Magenta (Red). No. 373 Cyan (Blue). These colours are the same as those employed for Series 1.

### SERIES 4. For Carbon Wet Printing Process.

No. 470 Yellow. No. 472 Magenta (Red). No. 473 Cyan (Blue). These colours are similar to Series 1 and 3.

## ANAGLYPH PIGMENT PAPERS

Anaglyph Red.

Anaglyph Green.

Made for the production of stereoscopic and anaglyph prints or transparencies by the Carbon and Carbro processes.

## TRANSPARENT YELLOW

A special pigment paper made with a transparent yellow colour for the production of Carbro transparencies for projection. Price is the same as for standard yellow.

### (A) PRICES

		Series 1, 2 and 3 and Anaglyph	Series 4
Whole Band	30 ins. $\times$ 12 ft. 76 $\times$ 360 cm.	26/3	33/-
Half Band	15 " $\times$ 12 " 38 $\times$ 360 "	14/-	17/6
Quarter Band	15 " $\times$ 6 " 38 $\times$ 180 "	8/-	10/6

All the above Pigment papers can be supplied in packets containing 1 dozen pieces of any desired colour or assorted (i.e. 4 of each colour). In making up these packets care is taken to see that all pieces are cut in the same direction from the original band.
